

Impressive Solutions has implemented print on demand systems in a number of industries. These include:

- commercial printing,
- state government print services,
- federal government print sites,
- multi-national consulting firms,
- large corporation 'in plant' printing, as well as typical 'in plant' printing facilities in manufacturing plants.

The DocXpress system provided by Impressive Solutions is fully scalable, allowing for the addition or deletion of printing equipment, including equipment installed in remote locations, permitting world wide control from a single site. Equipment deployed is industry standard Intel platforms utilizing Microsoft Windows, Win95 or Windows NT, 2000 and XP, although the web based applications can be used on any platform that can use a web browser including Mac, Unix and Linux.
